

## DOWNLOAD BLOCKED VIDEOS OR NEWS STORIES

Using Chrome: go to video page and right click (select Inspect from right click menu). In the inspector, go to the Sources tab. Scroll to Top / name of website / navigate to article or file folder called "Videos" . Then, in the source code window next to the navigation, search for "MP4" or ".mov" or ".wmv" to find a video file format. Then pull the url . In a new tab, paste the URL, and then when the video plays, right click to Save to Desktop.

The screenshot shows a web browser displaying a Fox News article. The article title is "CENTCOM says attempted Red Sea attack was second of its kind in consecutive days" by Greg Norman, published on March 29, 2024. The page features social media sharing icons and a video player. The Chrome DevTools Sources tab is open, showing the file structure of the page. In the source code, a video URL is highlighted: `"contentUrl": "http://vod.foxnews.com/media/v1/mp4/static/clear/694940094001/55fcd2e0-8"`. The search bar in the Sources tab shows "mp4" and "3 characters selected".
